PROFESSIONAL SUMMARY

I am a dedicated Computer Science undergraduate specializing in Data Science, with a deep passion for solving complex, real-world problems at the intersection of Cybersecurity, Artificial Intelligence, and Full-Stack Web Development. Backed by a strong academic foundation and enriched through impactful internships and hands-on projects, I bring both technical proficiency and practical insight to my work. A collaborative team player and committed lifelong learner, I continuously strive to upskill, innovate, and make meaningful contributions to the ever-evolving tech landscape.

EDUCATION

B.Tech, CSE (Data Science)

GVP College of Engineering (Autonomous)

• CGPA: **9.08/10**

Nov 2022 – Present

Visakhapatnam, India

EXPERIENCE

AIML Intern (Virtual)

Google (AICTE, EduSkills)

- Completed internship on AI/ML fundamentals and intelligent systems.
- Explored ML workflows and emerging AI trends.

Jan 2024 – Mar 2024

VAPT Intern (Virtual)

Cyberthreya

- Detected 15+ vulnerabilities using Nmap, Burp Suite, Metasploit.
- Automated scans and created VAPT documentation.

Mar 2025 – May 2025

Cloud Security Intern (Virtual)

Zscaler

- Completed info on segmentation, Zero Trust, firewalls.

Apr 2025 – Jun 2025

Ethical Hacking Intern (Virtual)

InlighnTech

- Identified OWASP Top 10 flaws; wrote mitigation reports.

Jul 2025 – Present

PROJECTS

GVPXplore – College Portal | MERN Stack, REST APIs, JWT

- Developed full-stack web portal with user roles using MongoDB, Express, React, Node.
- Integrated REST APIs and JWT-based authentication.

Phishing Email Detection System (in progress) | Splunk, SIEM

- Created detection rules using regex and email log parsing in Splunk.
- Simulated email threats and tuned alerts using SIEM tools.

Steganography Tool | Python, OpenCV, PIL, Tkinter

- Built GUI app to hide messages inside images using LSB technique.
- Implemented OpenCV and PIL for image processing.

Wordle Game | Python, Tkinter

- Developed a GUI-based Wordle game using random word logic and validation.

Air Gesture Calculator | Python, MediaPipe, OpenCV

- Built a contactless calculator using real-time hand gesture detection.
- Utilized MediaPipe hand landmarks and OpenCV for gesture tracking.

Cook With the Chef | HTML5, CSS3, JavaScript, html2canvas

- Created interactive recipe builder with screenshot feature and dynamic UI.

Snakes and Ladders Online | JavaScript, Node.js, Socket.io

- Implemented real-time multiplayer logic using WebSockets (Socket.io).
- Handled game states and server-side communication.
